This text has become a standard revision aid for students preparing for examinations in obstetrics and gynaecology, particularly those candidates for the MRCOG Part I. The authors present a wealth of information in a concise, didactic format, focusing on those facts that are generally considered non-contentious. The fourth edition includes both new and revised material, reflecting current understanding of the basic sciences underpinning the practice of obstetrics and gynaecology. This book will be of value to the student and also those professionals wishing to refresh their basic scientific knowledge.
